

Colour and Finish Specification Guide

A project-selection guide for factory-applied paint, veneer, laminate, primed and paint-grade fire doors.

Finish families

Factory paint	Project-specified RAL colours, subject to confirmation and sample approval
Wood veneer	Oak, walnut and other selected veneers subject to availability and specification
Laminate	Decorative and performance laminates selected against project requirements
White primed	Factory-primed surface ready for the agreed finishing process
Paint grade	Prepared substrate for project finishing where specified
Bespoke finish	Special colours, grains or references reviewed during technical coordination

Specification notes

Colour appearance varies across screens, print, substrate, sheen and lighting. Physical samples and manufacturer references should be approved before production. Finish build-up and edge treatment must remain compatible with the selected fire-door construction and supporting evidence.
